

IMI BOPP & REUTHER

IMI Bopp & Reuther designs, manufactures and distributes high quality safety, control and shut off valves. Our technology ensures that people and investments are protected while conserving natural resources and raw materials.

The market's leading operators of conventional and nuclear power plants have placed their trust in our expertise; one of our main objectives is to ensure that we deliver great engineering solutions which exceed our customers expectations. Sensitive processes in industrial plants such as chemical, petrochemical and refineries also rely on our valves to ensure that critical processes are safely and efficiently protected and controlled.

IMI Bopp & Reuther combine decades of experience, expertise and knowledge in our customer's processes to provide complete solutions that satisfy the exhaustive demands that the industry faces. We strive continuously in our search for new technologies and materials to re-ensure we lead for efficient, individual solutions with first class consultation and service.

Engineering 
GREAT Solutions

Critical applications

Process industries

Partner of the Process Industries – for more than 135 years, IMI Bopp & Reuther safety valves can be found wherever pressure systems for steam, gases and liquids need to be reliably protected. Customers from every area of the process industry benefit from our experience and process expertise.

We develop both individual solutions and standard products for all areas, such as chemical and petrochemical industries, refineries, polymer applications and process steam systems. With innovations we continuously support plant engineers and operators in their efforts to achieve increased economic efficiency and flexibility. Our solutions for critical materials and operating conditions help to optimise processes and protect people and plants.

Conventional power

IMI Bopp & Reuther safety, shut off and control valves can be found wherever there is a need to safeguard or precisely control the operating conditions in steam and water systems.

Today IMI Bopp & Reuther is a recognised and approved manufacturer of safety, shut off and control valves as well as a complete system solutions provider for all types of power plants:

- Coal Fired Power Plants
- Combined Cycle Power Plants
- Industrial Power Plants
- Combined Heat and Power Plants
- Desalination Plants
- Biopower Plants
- Cogeneration Power Plants

Nuclear Power

A reliable partner for the nuclear power industry since the 1960s. Based on years of experience, we design, manufacture and supply new and replacement valves for upgrades, new plants and special individual applications.

A strong partnership with the nuclear industry has developed as a result of this close and trusted relationship.

The exchange of experience and information has also resulted in the continuous expansion of our product portfolio with the associated research and development that goes behind each customised solution, tried and tested in our own testing facilities and continuously updated to include the latest in technology and materials.

Key technologies

Safety valves

Safety valves have the function of preventing inadmissible overpressure in pipe systems, pressure vessels and boilers, in order to avoid danger to people, plant and the environment. IMI Bopp & Reuther manufacture a wide range of valve types, sizes and pressures. We operate a world-class valve test laboratory to aid our mission for improved performance and reliability.

Control valves

IMI Bopp & Reuther has designed and manufactured control valves over many decades. Used in applications with high temperatures and pressures, our range of control valves serve all applications in power generation.

With desuperheating incorporated, we offer a complete range of valves for precise control for reducing steam temperature and pressure.

Aftermarket service

Many of our safety, shut off and control valves are still in use after decades of reliable operation. We undertake regular maintenance as well as expert refurbishment and repairs on your behalf. Thanks to state-of-the-art robot technology, we are able to perform many tasks directly on site, saving time and cost. IMI Bopp & Reuther Service & Support has a 24/7 hotline.
